30x60, 60x60, 15x120, 60x120,
30x90, 30x120

ROCK STONE BRICK CHOCOLATE ROCK

KORDEKO flexible tile is

a beautiful façade and interior solution designed to last for decades.

KORDEKO is a flexible cladding tile based on PletaFlex technology, made from natural marble powder, a multilayer membrane, latex compounds, plasticizers, and other binding components. It combines the visual appeal of natural stone and brick with the light weight, flexibility, and durability of a modern material.

1. What the customer gets by choosing KORDEKO

- 30+ years durability

Resistant to cracking, does not crumble, and withstands impacts, moisture, UV radiation, and extreme temperature changes.

- Flexibility and low weight

Perfectly adapts to complex shapes: arches, columns, bay windows, curves, and uneven walls. The load on the façade and foundation is significantly lower than with natural stone or clinker.

- Energy efficiency

Helps reduce heat loss in winter and prevents wall overheating in summer, increasing indoor comfort and lowering heating and air-conditioning costs.

- Resistance to moisture and dirt

The surface does not absorb water and features a “lotus effect”: water droplets roll off easily, and the surface is simple to clean with regular water.

- Premium aesthetics

Collections inspired by natural stone, brick, marble, wood, slate, and bush-hammered stone, available in modern and classic shades. Suitable for private homes, commercial buildings, and interior spaces.

2. Where KORDEKO flexible tile can be used

- Façades of private houses, townhouses, and apartment buildings
- Commercial properties: shops, cafés, offices, hotels, and business centers
- Plinths, entrance areas, balconies, terraces, and fences
- Interiors: living rooms, halls, TV areas, offices, restaurants, and fireplaces
- Renovation and restoration of old façades without removing the existing finish (with proper surface preparation)

3. Installation: fast, clean, and uncomplicated

- Installed on a prepared surface using tile adhesive (selected according to color and operating conditions).
- Compatible with concrete, plaster, brick, OSB, sandwich panels, metal, and other substrates when the appropriate primer is used.
- Minimal dust and noise — suitable for installation on active sites (offices, shops, cafés).
- Ideal for both new construction projects and renovations.

For maximum service life and a flawless appearance, we recommend installation by KORDEKO certified teams or our authorized partners.

4. Why KORDEKO is a cost-effective solution

- Much lighter than natural stone and clinker, reducing stress on walls and foundations.
- Lowers installation, transport, and preparation costs.
- Enables complex design solutions that are impossible with rigid and heavy materials.
- Delivers a modern, clean, and premium look for many years to come.

REGISTRATION CERTIFICATE

This certificate confirms that the management systems of

"HALTEMAN GROUP" S.R.L.

MD-2037, 14, Voluntarilor street, Chişinău municipality, Republic of Moldova
